ARTEM DONETS

Ph.D. | P.Eng. | Researcher | Engineering Manager / CTO | Renewables Expert

Calgary, Canada • (825) 994-8528 • donets.ive@gmail.com • don-ar.github.io • DOB: July 21, 1988

PROFESSIONAL PROFILE

Bringing nearly **20 years of experience** in complex engineering projects, including solar and wind power plants with a cumulative capacity **exceeding 2 GW**. Certified Professional Engineer (**P.Eng.**) and Senior PV Expert recognized by DEWA (Dubai Electricity and Water Authority). Exceptional organizational and coordination skills across all project phases—from conceptual design, detailed engineering, cost forecasting, and construction through commissioning, quality assurance, and O&M handover. Actively engaged in R&D and scientific publishing as a Ph.D. in renewable energy.

Designed, constructed, commissioned, and owner-engineered multiple utility-scale renewable power plants (examples: 800 MW wind, 246 MW, 200 MW, 2×150 MW, 45 MW, 40 MW, 25 MW, 14.2 MW, 12 MW, 10 MW, 4.2 MW, 4.1 MW, 1.1 MW, 100 kW and others). Experience in energy audits and grid code compliance.

"Give me a lever and a fulcrum on which to place it, and WE will move the world."

PROFESSIONAL EXPERIENCE

Project Technical Manager

DGS Energy | Calgary, Canada | April 2025 – Present

- Provide comprehensive engineering support for renewable energy projects and clients (including Swift Current and Nafar Energy).
- Prepare technical specifications for substation equipment, review vendor drawings, and coordinate directly with equipment manufacturers.

Engineering Coordinator

Tetra Tech | Calgary, Canada | April 2023 – Present

- Coordinate design, construction, and Owner's Engineering (OE) services for a large-scale portfolio of renewable energy projects—including utility-scale solar, wind, hydro, and high-voltage (HV) substations—representing several GW of cumulative capacity across North America.

Co-founder, CTO

CONCEPTR | Kyiv, Ukraine | January 2022 – 2024

- Led development of a web-based product utilizing gamification, machine learning, geospatial data, and manufacturer equipment data to help energy developers optimize project decisions. Took the product from concept to MVP.

Project Technical Manager

Scatec ASA | Kyiv, Ukraine / Oslo, Norway | November 2018 – 2023

- Managed business development and full project execution from conceptual design to O&M handover across 12 renewable energy projects with cumulative capacity exceeding 1 GW.
- Oversaw detailed design process, design & cost reviews, engineering deliverables against baseline schedule, interface management (FIM, PV, HV), grid code compliance, commissioning, and technical take-over.
- Coordinated with LTAs (Wood, WSP, DNV), contractors, and site teams; reduced timeline between Technical Take-Over and COD.

ARTEM DONETS

Ph.D. | P.Eng. | Researcher | Engineering Manager / CTO | Renewables Expert

Electrical and Communication Manager

NBT / Hustad & Granaas | Ukraine | October 2020 – February 2021

- Provided full engineering and management support for an 800 MW wind power project, including detailed design reviews, FIDIC Silver Book negotiations, and grid code compliance support.

PV Expert / Engineering Manager

YTT Solar Resources | Dubai, UAE | June 2018 – March 2019

- Delivered quality assurance and engineering management support across the project lifecycle using appropriate methodologies and best practices.

Lead Engineer

Karbon Invest | Kyiv, Ukraine | December 2016 – August 2018

- Led design of major Ukrainian solar projects totaling >600 MW, including the 246 MW and 200 MW Nikopol plants (among the largest in Ukraine/Europe at the time) and the 10 MW Triffanovka plant.

Researcher / Chief Electrical Power Engineer

Institute for Renewable Energy, NAS of Ukraine | Kyiv, Ukraine | July 2011 – 2023

- Performed detailed design, calculations, specifications, and technical studies for multiple solar projects (4.2 MW Sychevka, 4.1 MW Ternopil region, 1.1 MW Gurzuf, 100 kW Remontnik, 60 kW Uzhhorod, and others).
- Contributed to scientific publications, conferences, and R&D in renewable energy and energy independence. Supported feasibility studies and EPC negotiations.

EDUCATION

Ph.D. in Engineering Science — Institute for Renewable Energy, National Academy of Sciences of Ukraine | 2011 – 2017

Master of Science, Power Engineering (with honors) — National Technical University of Ukraine, Igor Sikorsky Kyiv Polytechnic Institute | 2005 – 2011

TECHNICAL SKILLS

Design & Simulation: AutoCAD, Autodesk Inventor, Autodesk Revit (BIM), SketchUp (Skelion), 3ds Max, SolidWorks, AnSys, DIALux, Helioscope

Renewables Tools: PVsyst, PVGIS, PVWatts, PVDesign, PVCase, Homer Energy, Vipor

Analysis & Programming: MATLAB/Simulink, MathCad, Wolfram Mathematica, Python (pandas, numpy), C++, HTML/CSS/Bootstrap, NI LabVIEW

Project Tools: Primavera, MS Office (Project, Visio, Excel, etc.), Photoshop

LANGUAGES & CERTIFICATIONS

Languages: English (fluent), Ukrainian (native), Russian (native)

Certifications: Certified Senior Renewable Energy Expert by DEWA (Dubai); Professional Engineer (P.Eng.); Engineering/Project Manager Certificate (Ukraine); Lead Engineer Certificate (Ukraine); SCADA Specialist (Norway); Energy Independence Certificate (USA)

Multiple scientific publications in Ukrainian and international journals (list available upon request).

SELECTED TECHNICAL CONTRIBUTIONS

- Developed Python tools that generate digitally signed XML day-ahead energy yield forecasts for PV plants and upload them to grid operator systems.
- Created machine-learning-assisted algorithms (Python, pandas, numpy) that significantly improve PV yield forecasts, reducing multi-million-dollar penalty exposure.
- Automated AutoCAD drawing adjustments via Python scripts, reducing update time from days to minutes.
